Education

University for Business and Technology Pristina, Kosovo

Graduation date: 2025

- Bachelor of Computer Science and Engineering
- Specialized in Software Engineering

Work Experience

Web Developer | *Caring For Kids, New Harbor, USA*

November 2024 – February 2025

- Developed and maintained the nonprofit's website (caringforkidsbristol.com), ensuring responsive design, accessibility, and modern user experience using HTML, CSS (Tailwind), and JavaScript/React.
- Worked closely with stakeholders to implement new features and content updates, utilizing a CMS to support the organization's outreach efforts..
- Improved site performance through code refactoring, image optimization, and best practices in frontend development.

Software Developer | *Upwork*

October 2023 – June 2024

- Contributed to the development and support of client software solutions, building scalable web applications and backend systems using .NET and TypeScript.
- Designed and developed high-performance RESTful APIs tailored to diverse client needs, focusing on maintainability and performance using C# and the .NET framework.
- Performed in-depth code reviews and debugging in Visual Studio and Git, ensuring clean, efficient, and production-ready code.
- Enhanced application performance by optimizing SQL/NoSQL database interactions and refactoring backend code structures.

Web Development Intern | *Roi Academy, Prishtina*

October 2021 - April 2022

- Collaboratively built and maintained robust web applications using ASP.NET and C#, implementing improvements to existing functionalities..
- Designed and implemented RESTful APIs for seamless data exchange between web applications and backend services.
- Championed code quality through rigorous code reviews and debugging processes, ensuring flawless web application delivery and utilizing version control (Git).
- Optimized web application performance by streamlining SQL database queries and refactoring code structures for efficiency.

Technical Skills

Languages: HTML5 | CSS3 (+ SCSS, BEM) | JavaScript ES6+ | Typescript | C# | C | C++ | PHP

Frameworks: React (+ hooks) | .Net | Node.js | Next.js | Vue.js | Material-UI | Tailwind CSS | Bootstrap

Technology: NPM | Git | Yarn | React Developer Tools | Firebase v9 | GitHub | Trello | Slack

Databases: MS SQL | MySQL | MongoDB

Specializing in software and web development/ applications.

Activities

- **Work & Travel Experience Summer 2022 & Summer 2023** – Sponsored by **CIEE**(Council on International Educational Exchange)
- **Kosovo United States Alumni(KUSA)** member
- **Coding with Mendix workshop** – Mitrovica, Kosovo
- **Volunteering** – Rolling film festival in Prishtina, Kosovo – Caring For Kids in New Harbor, Maine, USA
